

20 Microns Nano Minerals Receives DSIR Recognition for Its In-House R&D Centre

16 May 2025

20 Microns Nano Minerals Limited, a subsidiary of 20 Microns Limited, has received recognition from the Department of Scientific and Industrial Research (DSIR), Ministry of Science and Technology, Government of India, for its in-house Research & Development (R&D) facility.

The recognition represents an important milestone in the company's ongoing focus on research, product development and technology-led innovation in industrial minerals and specialty materials. The company's R&D activities support the development, improvement and application of mineral-based solutions across diverse industrial sectors.

The recognition is expected to strengthen the company's ability to pursue structured R&D programmes and may provide access to applicable government incentives, collaborative opportunities and other support mechanisms available to recognised in-house R&D facilities.

20 Microns continues to invest in technical capabilities, application development and process improvement to support evolving customer requirements and the development of higher-value mineral solutions.
