

## 20 Microns Strengthens Ownership of 20 Microns Nano Minerals to 99.99%

23 May 2025

---

20 Microns Limited has strengthened its ownership in 20 Microns Nano Minerals Limited by acquiring the remaining equity shares required to increase its holding from 97.21% to 99.99%.

The transaction involved the acquisition of 2,49,891 equity shares for an aggregate consideration of approximately ₹489.79 lakh. Following the acquisition, 20 Microns Nano Minerals became a wholly owned subsidiary in substance, with 20 Microns Limited holding 99.99% of its equity.

The increased ownership is intended to strengthen management control, streamline decision-making and support closer integration of the subsidiary with the company's overall mineral and specialty-materials strategy.

The move is aligned with 20 Microns' broader objective of strengthening its core businesses and improving the effectiveness of its operating structure.
