

20 Microns Showcases Advanced Mineral Solutions at K 2025 in Düsseldorf

8–15 October 2025

20 Microns participated in K 2025 in Düsseldorf, Germany, from 8 to 15 October 2025, presenting its portfolio of industrial minerals and specialty solutions for the rubber and polymer industries.

At Hall 8B, Stand C73, the company showcased mineral and specialty products including talc, kaolin, calcined clay, precipitated silica, bentonite and specialty additives.

The portfolio was positioned for applications across tyres, rubber goods, footwear, hoses, seals and other polymer-based systems, highlighting the company's focus on formulation performance, consistency and application-oriented technical support.

The participation provided an international platform for 20 Microns to engage with customers, partners and industry professionals and to strengthen its presence in global mineral and polymer markets.
