

20 Microns Expands Mineral Resource Base with Acquisition of Shree Shrest Minerals

14 August 2026

20 Microns Limited acquired a 99.99% partnership interest in Shree Shrest Minerals, strengthening its access to mineral resources and mining rights in Rajasthan.

Shree Shrest Minerals is registered in Rajasthan and holds business, assets and mining rights, including a mining lease, near Village Khakharmala, Tehsil Raipur, District Bhilwara. The partnership is engaged in the mining and extraction of quartz and feldspar.

The acquisition was completed for a consideration of ₹1.50 crore. The transaction adds to 20 Microns' mineral-resource platform and supports its focus on strengthening captive and strategic sourcing capabilities.

The acquisition is aligned with the company's broader strategy of developing reliable mineral resources, improving supply-chain integration and supporting the long-term expansion of its industrial minerals portfolio.
