

# 20 Microns Strengthens Construction Chemicals Business Through Sievert 20 Microns Building Materials

2025–26 | Date to be finalised

---

20 Microns continues to develop its construction chemicals business through Sievert 20 Microns Building Materials Private Limited, its joint venture platform associated with Sievert Baustoffe Auslandsbeteiligungen GmbH, Germany.

The joint venture forms part of 20 Microns' strategy to extend its mineral and formulation expertise into construction-material applications and to build capabilities in value-added building products.

The company's current investor and corporate disclosures identify Sievert 20 Microns Building Materials Private Limited among its subsidiaries and associates, with annual reports available for FY2024–25 and FY2025–26.

The business represents an additional platform through which 20 Microns can combine its experience in mineral technologies with construction-material and building-product capabilities.

This is a reconstructed editorial draft, not a verbatim original press release. Confirm dates and financial or regulatory statements before publication.

Editorial note: This item is retained as a corporate-update draft because the available public company page does not provide a single dated 2025–26 press release covering the full development.
